

## GDR Addresspoints Give You:

- Specific information about a building or site
- Reduced response times—avoid misrouting to a customer location
- Highly accurate spatial context of building locations
- Support and maintenance services help keep your dataset current

## GDR Solutions

### Addresspoints

Addresspoints (patent pending) is a highly precise dataset that accurately displays rooftop level U.S. residential and commercial buildings with optional consumer and business data attributes enabling both precise routing to a building location as well as site-specific intelligence. Addresses are individually located by point and building structure on each map (not just estimated or geocoded), to display every structure in its actual location via a rooftop point.

Whether your organization or company has existing GIS data or no data at all, GDR can provide a GIS data solution that will meet your specific needs. GDR helps you harness the power of GIS by providing the following advantages:

- **Ground truth**—pinpoint individual addresses
- **Unparalleled accuracy** in spatial contexts
- **Customization**—virtually any site-specific data can be integrated
- **A single map dataset** from multiple data sources
- **Fast turn around** & quick support response
- **On time projects**—delivered on or before deadlines

Addresspoints can be a tremendous advantage for a variety of industries and applications. Custom-built to fit your specific industry needs, Addresspoints can provide your organization with; residential and commercial data, contact information, demographics, value of home, building information and infrastructure—almost any detail can be included. Addresspoints helps you gain valuable information quickly and visually.

Contact GDR for more information on how Addresspoints and other GDR Solutions can help your organization.

## Corporate Overview

GIS Data Resources, Inc. (GDR) provides custom-built GIS data for the private and public sectors by leveraging its archive of millions of U.S. parcels, satellite and aerial imagery, tax assessor information and a host of other location-based datasets to provide its products and services.

GDR is certified by the Women's Business Enterprise National Council (WBENC), the nation's leading advocate of women-owned businesses as suppliers to governmental organizations and America's corporations. The Women's Business Enterprise National Council (WBENC) recognizes and honors outstanding results in world-class supplier diversity programs.

Virtually any site-specific data can be integrated into Addresspoints.
